

Advancing society through great engineering

WHO WE EXIST FOR

The members, the profession and the Australian community

OUTCOMES TO ACHIEVE

Contemporary
future-fit engineering
workforce

A more diverse,
engaged engineering
cohort

Increased impact and
value of the EA network

Engineering, leadership
and influence for
society benefit

Recognition of the
value of engineering

WHAT WILL WE DO?

- Recognition of Chartered engineers
- Advance world-class standards
- Ensure ethical and competent practice

- Inspire the youth
- Build engaging STEM partnerships
- Provide flexible education pathways

- Focus member expertise on key challenges
- Sharing new knowledge and practices
- Connect and engage all engineering minds

- Position engineers as society's problem solvers
- Grow influence on major issues – Skills, STEM, Climate and Circular Economy
- Partner and lead on future challenges

- Promote contemporary engineering identity
- Showcase engineering impact
- Celebrate engineering excellence

ANNUAL PRIORITIES 2023-24

Evolving standards for future engineers by supporting ethical, competent and high-value engineering practice

Expand EA's community by engaging and reaching anyone with an interest in engineering

Introduce new ways of volunteering enabled by modern tools and technology

Be more visible and influential in the national interest by setting data-driven and evidence-based agendas

Effective industry partnerships to increase public awareness of the profession and its contribution

Enabled by an adaptive and future-ready business with a diverse, empowered and capable workforce
